W07 Task: Reflection

Yonghwan Lee

In order to be a good source,

1. Make a comment

    A. For the assignment, I looked at my JavaScript code again. And, I could not know what the code is for.

    B. I will get a lot of chances to work with somebody else. If I make a good comment, the comment is going to come in handy.

2. Writing a code regularly

    A. I learned Python before studying JavaScript. So, I am really serious about the line and code positions. Also, others can feel comfortable to see my code.

3. Writing a difficult part or errors that you get and how to solve the errors

    A. When I write a code, I sometimes get some errors. Of course, I will take so much time. If I solve the errors and write how to solve this problem, I can solve the same problem when I get same errors.

4. Try to write code with several ways

    A. Coding can make a same result even though I write the code differently. And if I try to write a code with different ways, I can know which way is faster.

    B. Also, this is going to be my strength.

5. Make a good a name of function

    A. When I learned Coding at the first time, I did not concern about the function name. However, I figured out that the name is really important.

    B. I do not everyday concern about my code that I made in the past. So, I cannot remember what the code is for. The function name is a key word.

    C. If I make a bad function name, it can makes me tired.
